

About Us

At West Linn MedSpa all of our procedures are performed by our board certified physician, Derek F. Norcom, MD, or our licensed aestheticians. To our Spa Director, Alina Norcom, client comfort is top priority. We're passionate about our services and believe that our spa offers a unique environment with a focus on quality patient care.

Treatment Philosophy

West Linn MedSpa provides results-oriented skin care treatments and aesthetic procedures in a peaceful setting and convenient location.

Your personal goals guide our individualized approach to your care.

where science meets beauty

Botox®

Restylane®

Painless Hair Removal

Chemical Peels

Laser Treatments

Microdermabrasion

Acne Treatment

Facials

Massage Therapy

Laser Therapies

The Aesthera PPx™ technology combines pneumatic energy and intense pulsed light to gently accomplish the following aesthetic goals:

- Painless Hair Reduction
- Skin Rejuvenation
- Rosacea Treatment
- Pore-Cleansing Acne Treatment

A breakthrough in patient comfort, virtually all patients require no anesthetic creams or gels.

Photodynamic Therapy

An FDA approved combination treatment of a natural substance, ALA, and light to treat photodamaged and acneic skin.

Skin Care Programs

Combination programs that utilize our MedSpa Skin Therapies, Laser Therapies and home-use skin care products to address individual treatment goals.

Medical Therapies

Botox® Cosmetic

The most requested cosmetic procedure in the world due to its safety and effectiveness at eliminating “dynamic” facial wrinkles. Botox® Cosmetic is an FDA approved treatment that reduces muscular contractions that cause persistent lines and wrinkles.

Restylane®

A safe and natural bio-identical hyaluronic acid filler that restores volume and fullness to the skin to correct facial wrinkles and folds.

Vein Treatment

A combination of small vessel sclerotherapy and laser technology to eradicate unsightly veins.

**All Medical Therapies are performed
by Dr. Norcom.**

We offer the following skincare products:
SkinCeuticals, PCA, Obagi NuDerm, Only Yourx,
Jane Iredale Mineral Makeup

MedSpa Skin Therapies

Chemical Treatments

These involve the application of medical-grade chemicals designed to encourage exfoliation, renewing skin tone and texture. They can minimize the appearance of surface lines, smooth out rough skin texture, aid in clearing acne or help fade hyperpigmentation.

Microdermabrasion

A safe and effective physical superficial exfoliation to remove dull epidermal layers, resulting in a fresh, smooth skin surface. Microdermabrasion can aid in reducing fine lines, minor acne scars, sun damage and can improve acne and oily skin conditions.

Corrective Treatments

Using scientifically based products and protocols, these treatment facials stimulate a true change in the skin – detoxifying, hydrating, firming or refreshing.

Indulgent Treatments

For the ultimate in relaxation and indulgence, these treatment facials are the perfect introduction to professional pampering.
